SBCA's WISCONSIN CHAPTER

About the Wisconsin Chapter

Founded in 1978, the Wisconsin Truss Manufacturers Association (WTMA) is a local chapter of the Structural Building Components Association (SBCA). WTMA is composed of truss and wall panel manufacturers as well as related suppliers to our industry.

Our members are located in Wisconsin, Minnesota and Michigan, and we also ship into other states in the Midwest.

Would you like to tour a truss plant?

By visiting a truss plant in your area, you can:

- ▶ Gain a better understanding of the manufacture of structural building components
- ▶ Ask questions and discuss issues with the industry representative leading the tour
- ▶ See first-hand why structural building components are the future of framing

Please let us know if you are interested in touring a plant near you!

Why use components? Why not?

Structural building components are the future of framing. Engineered components are more cost effective, environmentally friendly and durable than typical stick framing. Penetrating more markets each year across the country, components are designed to meet building codes and perform under wind and other stresses.

Why not use components?

EDUCATIONAL & TECHNICAL RESOURCES

Our Wisconsin Chapter is pleased to be able to offer you a multitude of educational and technical resources. Let us know what you need!

Live Seminars

Topics on which we can provide training include:

- ▶ Truss Basics and Terminology
- ▶ Component Construction and Plant Tours
- ▶ Building Component Safety Information (BCSI)
- ▶ Building Codes
- ▶ Green Building

Just a few of the groups we're educating are:

- ▶ Wisconsin Retail Lumber Association
- ▶ South Central Wisconsin Builders Association
- ▶ Madison Area Builders Association
- ▶ Carpentry Training Center
- ▶ Arnold & O'Sheridan Consulting Engineers

Online Courses

Designed for architects, engineers, specifiers, contractors, suppliers, building officials and members of the fire service, SBCA offers FREE Component Technology Workshops (CTW) – online multimedia courses addressing key issues affecting the structural building components industry. Continuing education credit is also available. For more information, visit our website, www.wiwtca.com and review our educational and technical resources.

Publications and Tools

Just follow the links on our website, www.wiwtca.com, to discover a wealth of online information on our industry. From the SBCA Load Guide to Building Component Safety Information, our website is a gateway to numerous publications and tools that can help you!

SUPPORTING THE BUILDING COMMUNITY

We're proud to be a part of the building community. We support our fellow industries as we all work together toward our common goals. These include:

- ▶ Wisconsin Building Inspectors
- ▶ Retail Lumber Associations
- ▶ Architects and Engineers
- ▶ Wisconsin State Code Development
- ▶ Wisconsin Builders Associations
- ▶ And many more!

Let us know how we can support you!
